

## Fiona Wood Foundation

### **Expression of interest for grants to attend EMSB**

“The Emergency Management of Severe Burns course teaches how to recognise, assess, stabilise and transfer the severely burnt patient.” (ZBA website)

The course is for health clinicians who work in the specialty of burns or who may find themselves providing initial management to a person with an acute severe burn.

The information is taught in five separate and complimentary sections:

1. Course Manual
2. Formal Lectures
3. Skill Stations
4. Interactive Discussion Groups
5. Simulated Burn Cases
6. Examination and Clinical Test- 50 question (MCQ) and simulated patient clinical scenario

The course is centred on learning and achievement, delivered by burns anaesthetic and ED consultants with senior burns nurses facilitating the learning.

A course manual will be distributed approximately three weeks before the course. The course manual is essential pre-course reading.

For more information | <https://anzba.org.au/education/emsb/>

If you would like to attend this course and be considered to receive a grant, please provide your expression of interest to Diane Lim at [diane@fionawoodfoundation.com](mailto:diane@fionawoodfoundation.com) by **13 August 2021**. You should explain, in writing with no more than 300 words why you should receive the funding, including prior learning, place of work, other courses attended. There will be up to three grants awarded at any one time, with applicants from regional and remote areas to be allocated a minimum of one grant.

# About the Fiona Wood Foundation

Lead by plastic and reconstructive surgeon and burns specialist Professor Fiona Wood, our not-for-profit Foundation facilitates the translation of knowledge from ground-breaking scientific and clinical research into pioneering new treatments for healing burns and minimising scarring.

Our impact is our research which spans the patient journey. From basic science, acute hospital, rehabilitation and return to quality of life our projects and our teams are intertwined, working together to make a difference.

**With the support of our partners and very generous community, we bring together the best scientists, researchers and clinicians to meet our objectives to:**

- improve understanding of burn injury and the interactions with the skin and all body systems
- develop new technologies and treatment to improve clinical care
- improve mental health outcomes
- educate the community.

We bring science to the bedside.

These education grants are proudly supported by the CBH Group through the Harvest Mass Management System (HMMS). For more information about CBH Group please visit | <https://www.cbh.com.au/community/hmms-donations>
